Art Unit: 2183

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, drawn to a Branch-Else-Return instruction, classified in class 712, subclass 233.
- II. Claims 2-3, drawn to a status register and flags therein, classified in class 708, subclass 525.
- III. Claim 4, drawn to a specialized constant-load feature, classified in class 712, subclass 225.
- IV. Claims 5-9, drawn to circular-increment and circular-decrement instructions, classified in class 708, subclass 672.
- V. Claims 11-12, drawn to an arithmetic unit, classified in class 712, subclass 221.
- VI. Claims 13-20, drawn to variously formatted instructions, classified in class 712, subclass 209.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-V and VI are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I-VI have separate utility such as each invention practiced in a computer system without the other inventions.. See MPEP § 806.05(d).

In addition, should applicants elect Group VI there would be a genus-species restriction, as follows.

This application contains claims directed to the following 7 patentably distinct species of the claimed invention: claims 14, 15, 16, 17, 18, 19, and 20.

Art Unit: 2183

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 13 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Tony Piotrowski on 8/21/03 to request an oral election to the above restriction requirement, but did not result in an election being made because of the complexity of the restriction.

Art Unit: 2183

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
